

# BlueJeans Rooms featuring Dolby Voice Room

Elevate your meeting room experience to exceptional

BlueJeans Rooms featuring Dolby Voice Room is the premier converged meeting room solution that brings together the finest in audio and video with an amazing user experience.

## Breathtaking simplicity delivered in a singular package

BlueJeans Rooms featuring Dolby Voice Room integrates several unique meeting room components to create an intuitive and immersive meeting experience without having to navigate a complex cord, tablet, and controller setup. The solution brings together the Dolby Voice Camera, Dolby Conference Phone, and Dolby Voice Hub with BlueJeans Rooms' one-touch join and enterprise-grade manageability to redefine the meeting room experience.

## Intelligent video makes it easy to follow the action

The Dolby Voice Camera leverages a 4K sensor and a 95-degree wide-angle lens to intelligently track people moving within the room or using a whiteboard, and automatically frames the screen appropriately. High Dynamic Range (HDR) video mapping adjusts contrast to help overcome lighting limitations.

## Stunningly clear and natural audio for more productive meetings

Optimize the experience for both in-room and remote participants with the Dolby Conference Phone. Experience superior audio clarity with 360-degree long-range pickup of the entire room conversation and voice placement that presents individual voices from distinct locations.

## Easy for IT to deploy, monitor and manage

Easy installation and simple IT management minimizes setup costs and deployment time, and centralized management through BlueJeans Command Center improves efficiency with bulk provisioning, remote device monitoring, and diagnostics.

## KEY FEATURES

### Intelligent Scene Framing

Automatically adjusts the framing of the image to show different people talking and avoiding frustratingly narrow or distractingly wide angles.

### Whiteboard View

Offers remote participants a helpful, head-on view of the whiteboard when someone is writing on it, while ghosting out people moving in front of the board to aid in legibility.

### High Dynamic Range (HDR) Video Mapping

Dynamically modifies screen appearance to account for different lighting situations and overcome the challenges that lead to a muddled or washed-out image.

### Full-Room Pickup

Captures distant voices with best-in-class range to more effectively capture quiet or overlapping voices.

### Dynamic Leveling

Continuously maps room sound to distinguish between talkers and noise, canceling out common room distractions like HVAC or projector noise.

### Voice Placement

Presents each speaker's voice from a distinct location to make it easier to follow and understand the conversation.

### MultiService

Dolby Voice Room offers MultiService support\* so that users have the ability to join the meeting service of their choice — BlueJeans, Microsoft Teams, Zoom or Cisco Webex.

### One-Touch Meeting Join

Initiate, join and manage meetings with one touch. Minimize time trying to make room equipment work.

### Calendar Integrations

Integrate the room's meeting schedule with both Microsoft or Google calendaring systems to enable participants to quickly join a scheduled in-room meeting and eliminate scheduling conflicts.

### Wired and Wireless Screen Sharing

Share screen content during video meetings wirelessly or use the HDMI input on the Dolby Conference Phone for a hardwire connection.

### Purpose-Built Internet Appliance

Dolby Voice Hub runs a hardened purpose-built OS, conforming to enterprise-grade security requirements, and uses HTTPS and SSH with SHA256 digital certificates.

### Remote Device Management

Provision, deploy, measure usage, and update hardware so it's efficient and easy for IT to monitor, while reducing costs and user problems.

## BlueJeans Rooms-as-a-Service

### Software, hardware and services in a single package

BlueJeans Rooms-as-a-Service brings together BlueJeans Rooms software, Dolby Voice Room or Dolby Voice Room Pro hardware, maintenance and support in an all-inclusive monthly price. This subscription service provides a simple way to outfit meeting rooms and huddle spaces with an integrated solution while avoiding time consuming hardware purchase cycles.
