

Dolby Voice Room and Microsoft Teams

Join a Teams Meeting with Dolby's premier room system

Update your conference rooms to support Microsoft Teams meetings with the incredible user experience and intelligent management capabilities of the Dolby Voice Room and Dolby Voice Room Pro, brought to you by BlueJeans.

Take your Teams experience to the next level

Dolby Voice Room enhances your Microsoft Teams Meetings by delivering next-generation conferencing capabilities. Intelligent Scene Framing, Whiteboard Mode, and HDR Video Mapping are just some of the features that will take your Teams Meetings to the next level. With intuitive controls and one-touch join, collaborating over Microsoft Teams from a room system has never been better.

All-in-one room solution removes management hurdles

The Dolby Voice Room from BlueJeans does not require an additional PC or in-room tablet to join, control, or manage a Teams Meeting. Dolby Voice Room uses the BlueJeans Gateway to connect to Teams Meetings and provides monitoring capabilities through BlueJeans Command Center. The Dolby Voice Room comes out of the box ready with purpose-built hardware and software and is enabled for automatic updates and over the air security patches.

Designed with every room in mind

BlueJeans now offers Microsoft Teams users both the Dolby Voice Room, optimized for small and medium-sized rooms, and the Dolby Voice Room Pro, designed for large and long rooms such as executive board rooms. The Dolby Voice Room Pro includes the Dolby Voice Camera Pro, an ultra-modern dual-lens PTZ camera that performs best in large room configurations. The Dolby Voice Camera Pro features a panoramic sensor, 12x optical zoom, and 170° wide-range pan.

Open and interoperable

Dolby Voice Room offers MultiService support so that users can join the meeting service of their choice. Paired with the BlueJeans Gateway, users can seamlessly join scheduled Microsoft Teams meetings with one-touch or manually enter the Teams conference ID and tenant ID for ad-hoc joining. Users can also join BlueJeans Meetings, Zoom Meetings, and Cisco Webex Meetings from the same device. Your existing Zoom and Webex room connectors will enable you to have Zoom and Webex meetings using your Dolby Voice Room.

Purchase or subscribe as-a-service

Dolby Voice Room and Dolby Voice Room Pro are now available as-a-service* so you can take advantage of the hardware, services, support, logistics, warranty, and forward replacement for an all-inclusive, monthly fee. Alternatively, you can purchase the hardware and software separately according to your needs.
