

Video Meetings for Education

Implement video across campus for dynamic learning and faculty or staff productivity.

User Scenarios

Distance learning

Teach courses or stream lectures for up to 15,000 students located anywhere in the world.

Guest lectures

Bring industry experts and alumni into the classroom virtually to connect students with the real world.

Virtual office hours

Conduct office hours at any time, without requiring students or faculty to stay on campus.

School administration

Connect faculty and staff across campuses for department meetings, vendor management, and more.

“Engineering is very collaborative and very intensive as far as applications, video, and research. We selected BlueJeans because it had the collaborative features we need, and more importantly, it was very interoperable with other systems. We have a lot of research sites with IP-based video conference systems, as well as students and faculty on desktop and tablet devices and we just wanted them to be able to connect. The platform speaks for itself. It’s really easy.”

– BINH TRAN, ASSOCIATE DEAN, VITERBI SCHOOL OF ENGINEERING,
UNIVERSITY OF SOUTHERN CALIFORNIA

Features

Easy to join

One-touch, 5 second join time from any mobile device, laptop, browser or room system with no dial-in number to remember.

Zero download meetings

All-in-one HD video, audio and web conferencing, with support via major browsers.

LMS integrations

Sync with commonly-used learning management systems including Canvas, Desire2Learn, Moodle, Blackboard, and others.

Unlimited recording

Never miss another lecture or meeting with click-to-record functionality and cloud-based storage for playback and sharing.

Room interop

Take advantage of existing room systems located throughout the university. Add, manage, and troubleshoot rooms centrally through a single console.

Content sharing

Share presentations and documents in real-time with leading edge screen share capabilities.

Unparalleled sound

Crystal-clear Dolby Voice audio features background noise reduction, allowing for productive meetings and classes, no matter where participants are.

Whiteboarding

Enhance the student experience by drawing directly on the shared screen so notations are visible to all attendees.

Secure platform

Ensure that everything remains secure with the platform trusted by over 8,500 organizations including universities and colleges around the world.

Key Benefits

Improve alumni relations

Keep alumni connected to the university through virtual alumni events and lecture series.

Streamline development

Boost fundraising initiatives by enabling development officers to reach alumni and corporate donors more efficiently.

Improve placement outcomes

Connect prospective employers to students by utilizing video conferencing for virtual interviews.

Enrich student services

Provide personalized student services over video conferencing, allowing students to receive counselling or other services from wherever they are.

Enhance daily operations

Enable faculty and staff to communicate and collaborate seamlessly with peers on campus or external colleagues, vendors, and institutions.

Interview faculty and staff

Streamline the hiring process for faculty and staff with remote face-to-face video interviews.
