

# BlueJeans Relay

Connect and modernize your conference room systems with BlueJeans' one-touch simplicity

BlueJeans Relay enables meeting participants to quickly join meetings from any room system with a simple and consistent touchscreen experience that integrates meeting schedules from your corporate calendar system.

## Simple one-touch meetings for all your meeting rooms

BlueJeans Relay works with your existing conference room systems to make video conferencing fast, easy, and consistent. Participants enjoy a simple meeting experience across their company and workplace when joining in-room meetings with BlueJeans Relay. The touch-to-join experience is quick and fool-proof, providing much-needed consistency across various types of room system equipment from different vendors.

## Works with your Cisco, Polycom, and Lifesize room systems

BlueJeans Relay supports Polycom, Cisco, Lifesize and most other most H.323 or SIP-based systems. While these systems are great for intracompany meetings, there are usually challenges connecting externally due to incompatibility and network constraints. BlueJeans Relay bridges the gap, taking the hassle-factor out of the meeting room, and connecting to customers and partners through video, regardless of what video platform they are using.

## Integrates room schedule information from your corporate calendar

BlueJeans Relay displays all scheduled room meetings for quick access and at-a-glance status on the availability of the room. By integrating with your corporate calendar system, meeting participants can join a scheduled or ad-hoc meeting within seconds. There is no more dialing and directories, clumsy "quick reference" cards for each unique system, and constant demand for IT support.

## Benefits of BlueJeans Relay

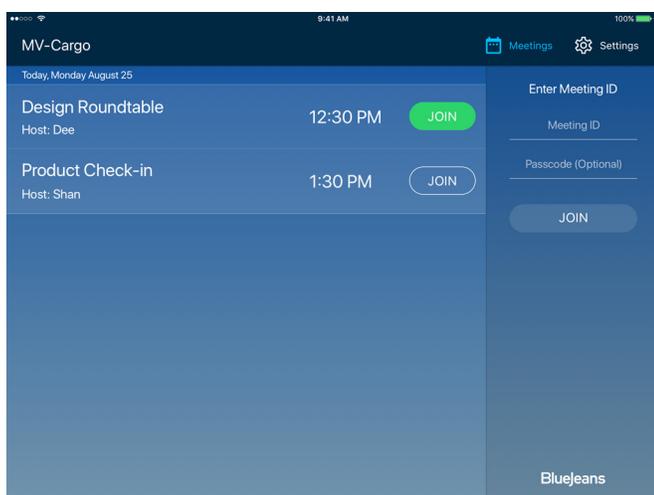

- Touch-to-join: a fast and foolproof way to join a BlueJeans meeting
- Displays all scheduled meetings for quick access and at-a-glance free/busy status
- Extends consistent simplicity to room systems from multiple vendors
- Works with most H.323 and SIP-based video conferencing room systems
- Available at no extra charge for BlueJeans customers

## KEY FEATURES

### Works with your existing room systems

BlueJeans Relay works with most H.323 and SIP-based systems, including:

- Cisco
- Polycom
- Lifesize
- Starleaf

When the conference room has been scheduled for a meeting, participants can join via the room system with a simple touch.

### Deployment options

BlueJeans Relay includes the Relay cloud service with step-by-step configuration instructions. Once your account is provisioned and software is enabled, most deployments can be configured in about an hour.

Additionally, with a service plan, you can receive guided configuration assistance from a BlueJeans Relay specialist.

### Solution requirements

- **BlueJeans account**, provisioned for BlueJeans Relay services
- **Listener Service**: Local host running Windows Server 2008 or later, Debian, Ubuntu, RedHat, Fedora, or CentOS
- **Calendars**: Microsoft Office 365, Exchange 2013, Exchange 2010, or Google Calendar
- **Tablets**: Android, iPad, and compatible Cisco and Lifesize tablet controllers
