

# BlueJeans Rooms with Dolby Conference Phone

Make any room a video room with stunning audio

**Ready, set, collaborate:** Modernize your workspaces and improve productivity. BlueJeans Rooms with Dolby Conference Phone is a streamlined solution that's easy to use and manage, provides breakthrough audio clarity, and seamlessly connects to BlueJeans video meetings.

- **Stunningly clear and natural audio for more productive meetings:** The Dolby Conference Phone provides superior audio clarity, with 360-degree, long-range pickup of the entire room conversation, Dolby noise suppression, and spatial audio that presents voices from distinct locations, optimizing the experience for both in-room and remote participants.
- **Fast and easy touch-screen control, wireless content sharing:** One touch of the Dolby Conference Phone lets you do it all: start, join, and manage the meeting; and share content wirelessly from anywhere in the room. No more fumbling with remotes or dongles.
- **Easy to deploy, control, and manage:** A single compact device for BlueJeans room audio, meeting management, and IP phone calls, the Dolby Conference Phone reduces clutter and simplifies management. Device management services enable bulk provisioning, remote device monitoring, and diagnostics to accelerate deployment, maximize uptime, and control costs.
- **Flexibility to deliver an outstanding experience for any room:** BlueJeans Rooms with Dolby Conference Phone delivers excellent audio to different-sized rooms. The solution includes industry-standard components, such as an Intel NUC PC, and Logitech Brio camera for smaller rooms or Logitech PTZ Pro 2 for larger rooms.
