

BlueJeans Integration for Slack

Instantly Move from Chat to Video

By integrating your BlueJeans service with Slack, your team can escalate chat conversations to HD video meetings. There's no need to leave Slack to host or join a BlueJeans meeting: just type the **/bluejeans** slash command in any channel, private group, or direct message. Hosts can join as a regular participant for informal conversations, or with full moderator controls to manage larger discussions.

- BlueJeans meetings can include room systems, desktops, mobile devices, and phones
- 100% Cloud: No video hardware to buy, upgrade, or maintain
- No download or installation required for Google Chrome and Chromebooks

Integrating BlueJeans with Slack

Your Slack team administrator can integrate Slack with any paid or trial BlueJeans account:

1. Go to the integrations page for your Slack team.
2. Click **BlueJeans**:

Blue Jeans

Video conferencing for desktop, mobile, and room systems

3. Click the Add **BlueJeans Integration** button and follow the instructions.

That's it! To start a BlueJeans meetings in your personal meeting room, type **/bluejeans**. To create a new room for one-time use, just add a name: **/bluejeans [meeting name]**.

Guests Welcome!

Your BlueJeans meetings are open to guests as well as members of your Slack team. Simply open the Participant panel in BlueJeans to send invitations by message or email. Guests can be from within our outside your organization, and can join from any supported endpoint, including computers, mobile devices, phones, and room systems.
